

2008 Mathematical Contest in Modeling Press Release—April 11, 2008

COMAP is pleased to announce the results of the 24th annual Mathematical Contest in Modeling (MCM). This year, 1162 teams representing institutions from fourteen countries participated in the contest. Nine teams from the following eight institutions were designated as OUTSTANDING WINNERS:

Duke University, Durham, NC
Harvard University, Cambridge, MA
Harvey Mudd College, Claremont, CA (2 Teams)
The College of Idaho, Caldwell, ID
Youngstown State University, Youngstown, OH
University at Buffalo, Buffalo, NY
University of Alaska Fairbanks, Fairbanks, AK
University of Delaware, Newark, DE

This year's contest ran from Thursday, February 14 to Monday, February 18, 2008. During that time, teams of up to three undergraduate or high school students researched, modeled, and submitted a solution to one of two modeling problems. The 2008 MCM was primarily an online contest. Teams registered, obtained contest materials, and downloaded the problem and data at the prescribed time through COMAP's MCM Website.

This year, the two MCM problems represented significant challenges. The author of Problem A, Professor Jerry Griggs from the University of South Carolina was also one of the final judges. Problem A, "Take a Bath," asked teams to consider the effects on land from the melting of the North Polar Ice Cap due to the predicted increase in global temperatures. Specifically, students were asked to model the effects on the coast of Florida every 10 years for the next 50 years due to the melting, with particular attention given to large metropolitan areas. Additionally, they were asked to propose appropriate

responses to deal with the melting. The author of Problem B, Veena Mendiratta, of Lucent Technologies, was also one of the final judges. Problem B, "Creating Sudoku Puzzles," asked teams to develop an algorithm to construct Sudoku puzzles of varying difficulty. The problem required teams to develop metrics to define a difficulty level. Further, the problem required each team's algorithm and metrics to be extensible to a varying number of difficulty levels, the algorithm to be illustrated with at least 4 difficulty levels, and an analysis of the complexity of the algorithm in the solution.

The nine **Outstanding** solution papers will be published in *The UMAP Journal*, along with commentary from the authors and other judges. All 1162 of the competing teams are to be congratulated for their excellent work and enthusiasm for mathematical modeling and interdisciplinary problem solving.

2008 MCM Statistics

- 1162 teams participated
- 14 high school teams (1%)
- 276 U.S. Teams (24%)
- 886 Foreign Teams (76%) from Australia, Canada, China, Finland, Germany, Indonesia, Ireland, Jamaica, Mexico, Korea, Singapore, South Africa, United Kingdom
- 9 Outstanding Winners (1%)
- 161 Meritorious Winners (13%)
- 478 Honorable Mentions (41%)
- 512 Successful Participants (44%)
- 2 Unsuccessful Participants (1%)

To obtain additional information about the MCM and to obtain a complete listing of all team designations, please visit the MCM Website at: www.mcmcontest.com, or contact COMAP at: mcm@comap.com.

Major funding for the MCM is provided by COMAP. Additional support is provided by the Institute for Operations Research and the Management Sciences (INFORMS), and Two Sigma Investments. COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that they are the only international contests in which students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, and workers.
